

“Why should I move to Office 365 Business Essentials from Exchange Online?”

For only \$1 more a month per user, you get much more than just email, including: Familiar Office apps including **Word, Excel, and Outlook** that can be accessed through a browser.

1 TB of storage with file sharing in OneDrive that can replace premium services like Dropbox.

HD video conferencing that saves money by replacing premium services like Go-to-Meeting or WebEx.

“What if I can’t get online or my Internet connection fails?”

Your files will automatically synchronize across all your devices when you’re back online.

Your Office 365 subscription includes a 99.9% up-time guarantee.

Also, data is continuously backed up for you in Microsoft’s geographically distributed data centers so that it’s there when you need it.

“I need to connect better with customers.”

By choosing Office 365, you can set up a social network for your business with Yammer, use voice and video chats with Skype for Business, and create interactive, multimedia reports and presentations with Sway.

You can also create a team site to share reports and other information.

“Why should I subscribe to Office 365, when I already own Office software?”

When you subscribe to Office 365 Business Essentials, your software is always up-to-date and accessible.

You’ll get the latest productivity and communications tools in one subscription. Office 365 Business Essentials works side-by-side with other versions of Office.

“I work in a highly regulated industry. Can I switch to Office 365 and stay compliant?”

Office 365 has been independently verified to meet compliance requirements for multiple industries, including law, healthcare, government, and education.

By moving to Office 365, you'll gain multiple capabilities that help you manage compliance, including data retention and data archiving features.

“My employees travel and work from home, and they need easy, remote access to more than just email.”

With Office 365, you can keep files synchronized across all of your devices and access them anytime, anywhere with OneDrive for Business.

“I'm worried about protecting my data in the cloud. How do I know it's secure, especially when people are using mobile devices?”

It's easy to protect your data with Office 365, which includes Microsoft's independently verified, world-class data security.

“How can I work better with my team, customers, and suppliers?”

You can create a team site so that everyone can collaborate on the same files and edit documents across any device. And because you control access, you can safely share files inside and outside your company

While working in your Office documents, you can check presence indicators to see who's online, and then you can IM or chat through voice or video with Skype for Business.
